2013 Student Asthma Register

Dear Parents/Caregivers,

We are currently updating our School Student Asthma Register for 2013. It is very important that if your child suffers with asthma, that we have all details of your child’s current asthma management plan. Students are encouraged to carry their puffers on them but if you prefer one to be kept in the office clinic, please provide one, clearly labelled with your child’s name. Thank you.

If your child suffers with asthma, please inform the school and complete an Asthma Management Plan form available from the front office. Thank you. Even if your child’s asthma is managed before and after school we still need to know if your child has a history of asthma and how it is to be treated in case of an attack.

Thank you for your assistance with this information.

Kind Regards,
Robyn Edwards
Deputy Principal
